

Additions and Corrections to the Pteridophyte Flora of Chihuahua, Mexico

IRVING W. KNOBLOCH* and DONOVAN S. CORRELL**

Since the publication in 1962 of our "Ferns and Fern Allies of Chihuahua, Mexico," several additional species have been found in the State. Also, some changes and corrections have been noted that should be made available to others.

ADDITIONS AND DELETIONS

1. *Selaginella mutica* D. C. Eaton var. *mutica*

Vicinity of Cerro Bola, Sierra del Paso del Norte (Juarez Mts.), on edge of the city of Juarez, *Knobloch 2110* (MSC). This specimen was verified by Rolla M. Tryon, Jr. This addition, which is also new to Mexico, was reported by Knobloch (*Amer. Fern J.* **56**: 36. 1966). In the same publication, new stations in Chihuahua were reported for *S. pallescens* (Presl) Spring and *S. rupicola* Underw.

2. *Anemia tomentosa* var. *mexicana* (Presl) Mickel

As a result of John Mickel's work on the genus, we now add this taxon to our flora and eliminate *A. anthriscifolia* Schrad. The latter, according to a personal communication from Mickel, does not occur in Mexico. All specimens cited in our manual are to be referred to *A. tomentosa* var. *mexicana*.

3. *Asplenium sessilifolium* Desv.

Reported from canyon below Basaseachic Falls by Timothy Reeves (*Amer. Fern.* **67**: 62. 1977).

4. *Bommeria subpaleacea* Maxon

According to C. Haufler (pers. comm.), *B. knoblochii* Maxon, which we cited as a valid species, is a synonym of *B. subpaleacea* Maxon (*Contr. U.S. Natl. Herb.* **17**: 169. 1913).

5. *Plagiogyria pectinata* (Liebm.) Lellinger

All of the specimens cited in our work as *P. semicordata* (Presl) Christ should be referred to this species. According to Lellinger (*Amer. Fern J.* **61**: 110-118. 1971), *P. semicordata* does not occur in northern Mexico.

6. *Pteris cretica* L.

Reported from the canyon below Basaseachic Falls by Timothy Reeves (*Amer. Fern J.* **67**: 62. 1977).

7. *Thelypteris puberula* var. *sonorensis* A. Reid Smith

Since var. *puberula* is not considered to occur in Chihuahua, all specimens in our manual should be referred to the var. *sonorensis*.

8. *Thelypteris ovata* var. *lindheimeri* (C. Chr.) A. Reid Smith

Santa Elena Canyon region in the extreme northeastern part of Chihuahua, *Brenckle & Koch 51032* (US), cited by Smith (*Univ. Calif. Publ. Bot.* **59**: 118. 1971).

*Department of Botany, Michigan State University, East Lansing, MI 48824.

**Fairchild Tropical Garden, Miami, FL 33156.

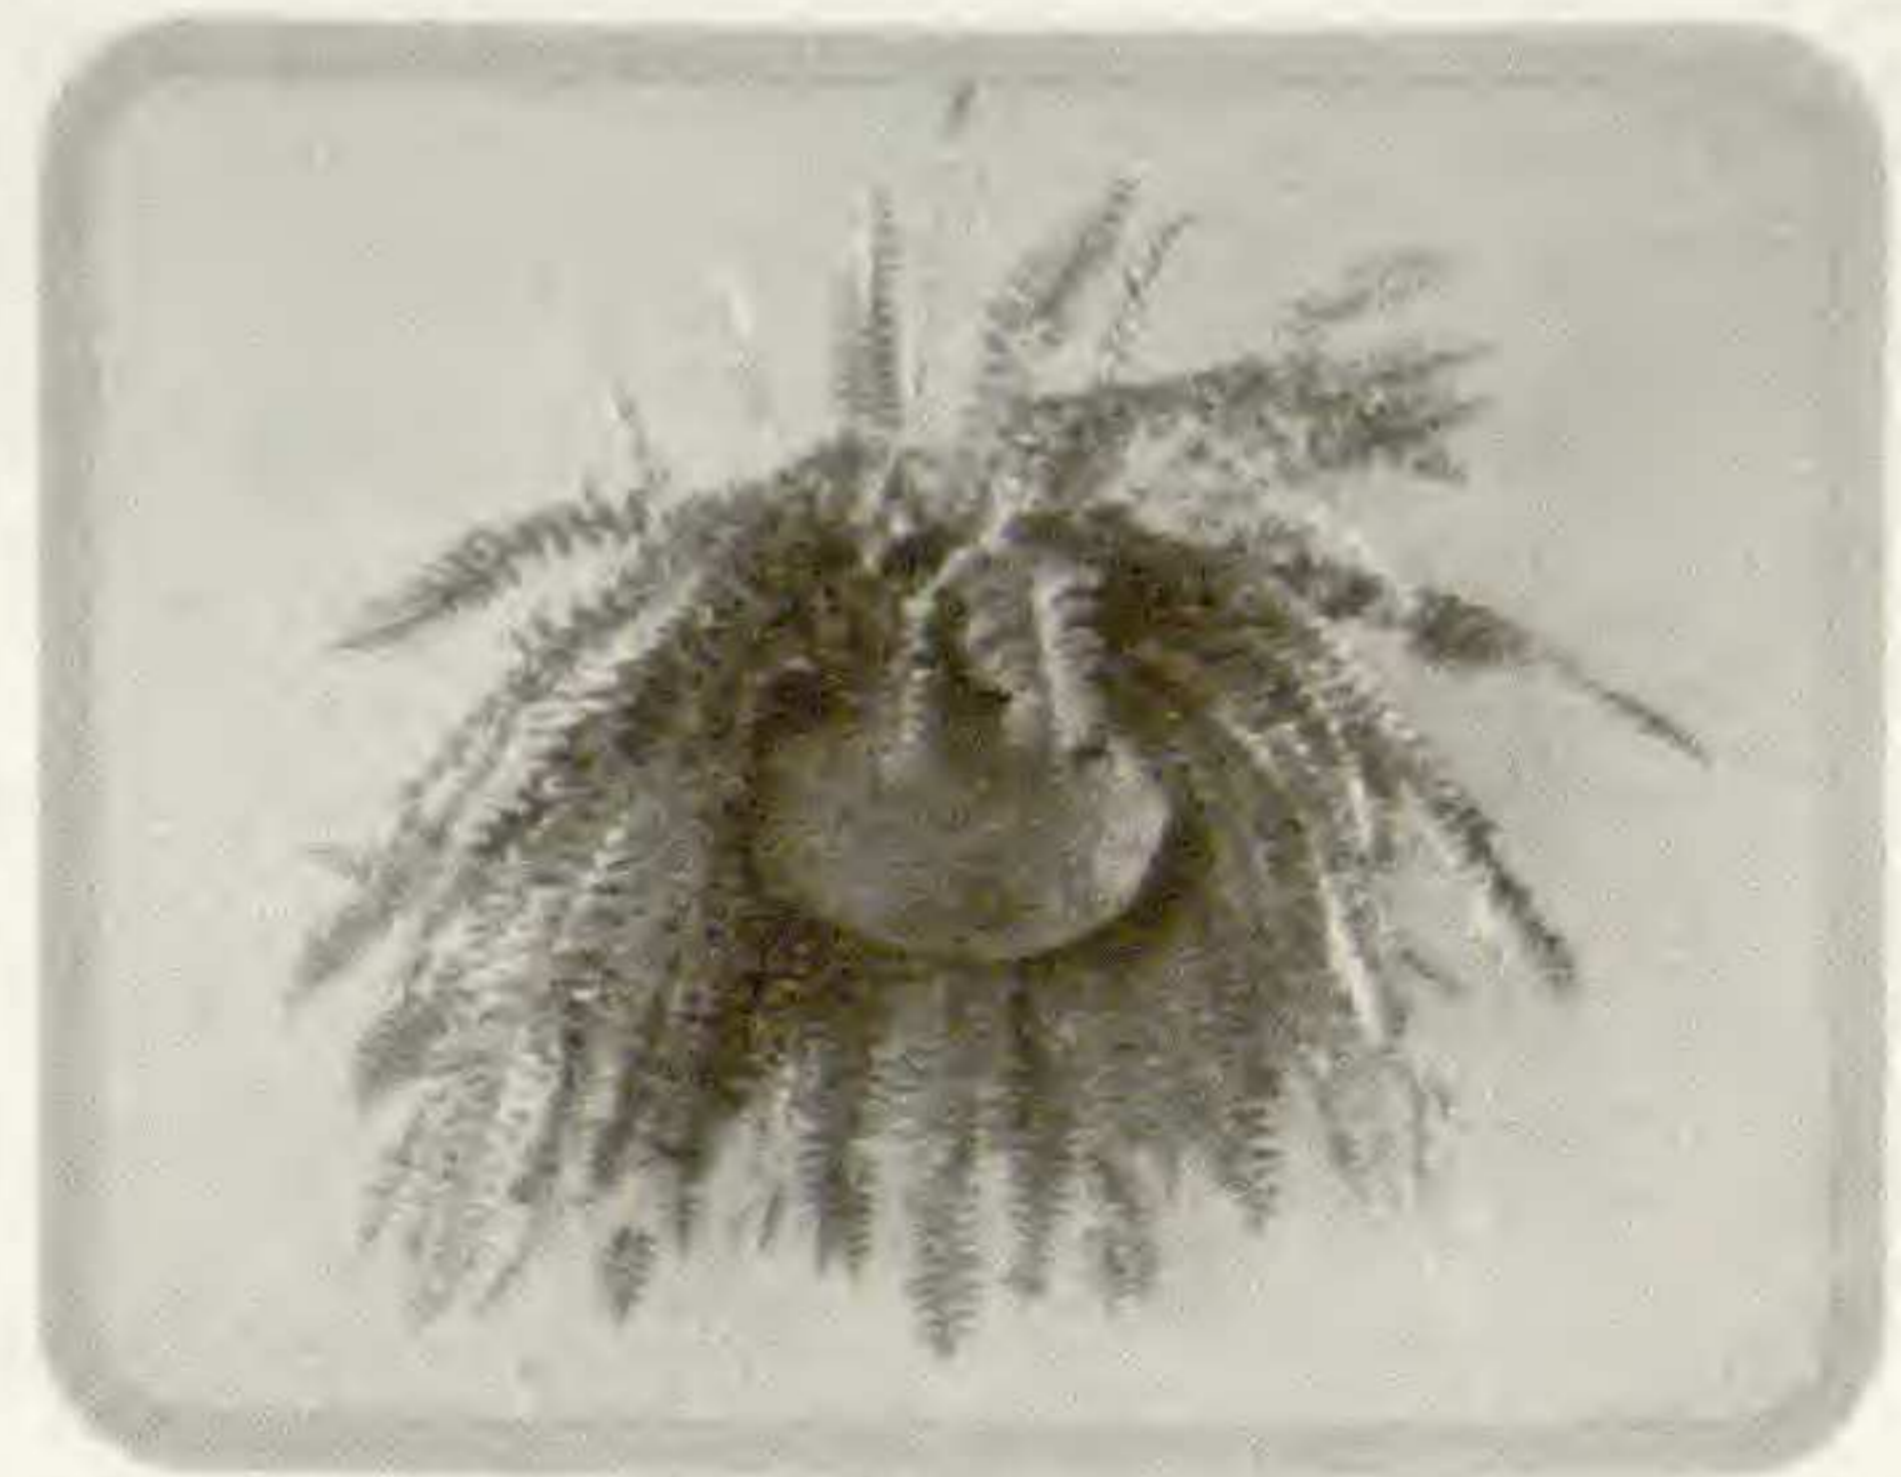

9. *Thelypteris resinifera* (Desv.) Proctor

La Bufa, southeast of Creel, *Knobloch 579* (MSC). This previously unidentified specimen is referable to this species, according to a personal communication from A. R. Smith.

CORRECTIONS

- Page 5, line 21: or Short-thorn Forest.
 Page 17: *Psilotum nudum* (L.) Beauv.; *Anemia tomentosa* var. *mexicana*.
 Page 34, line 5: omit Pl. 6.
 Page 35: *Equisetum laevigatum* = *E. × ferrissii* Clute.
 Page 36, line 34: after "ferns" add "and allies."
 Page 46, line 26: *Anemia anthriscifolia* = *A. tomentosa* var. *mexicana* (Presl) Mickel, Iowa State J. Sci. **36**: 427. 1962.
 Page 78, line 15: add Baja California.
 Page 78, line 34: add Baja California.
 Page 85, line 24: for "*Knobloch 584*" read "*Knobloch 449*."
 Page 85, line 41: for "bipinnate-pinnatifid" read "tripinnatifid."
 Page 87, line 6: add Arkansas.
 Page 93, line 32: add Missouri.
 Page 97, line 33: add Sonora.
 Page 100, last line: add Hidalgo.
 Page 102, line 1: *Cheilanthes meifolia* is now referred to *Aspidotis meifolia* (D. C. Eaton) Pic.-Ser., *Webbia* **7**: 327. 1950.
 Page 104, line 7: add Guanajuato, Jalisco, and Durango.
 Page 104, line 26: delete "*Knobloch 449*."
 Page 105, line 16: after "glabrous" add "occasionally hairy."
 Page 151, line 2 from bottom: add North Carolina.
 Page 180, line 4 from bottom: "Chihuahua," not "Chuhuahua."
 Page 184, line 5: "Segorachi" not "Sugorachi."

**PLANT Beautifully and Naturally
 in a COCO-GRO™ natural fiber
 hanging basket**

Enhance your plants! Made with reinforced brown coconut fiber, COCO-GRO™ Hanging Baskets provide drainage, retain moisture, aerate roots, and insulate. Sturdy, more durable than wire and moss, yet lightweight. Convenient direct planting. Weather treated jute hanger. Satisfaction guaranteed. 10" basket \$4.95; 12" basket \$5.75 postpaid. 13 Western States ONLY. Calif. residents add 6% sales tax. Send check or M. O. to:
